Enclosed for your review is a copy of the agreement used for setting up a mini non-paid internship. This is to request an approval for a young man from our senior heavy equipment class to visit Joe Guiliano and his crew for a spring internship to start end of March- beginning of April. This student is a Rome resident and is also attending RFA. The internship is to meet the requirements of work based learning for his certificate in career and technical education. He is 19 years old and would like permission to visit the department for mornings 3 days a week- Tuesday, Wednesday & Thursdays.

Thank you for always lending your support to these student experiences. Learning outside of the classroom and seeing live job sites leaves a strong impression on those who will make up our future workforce.

I have spoken to Joe Guiliano and he is willing to have the student join his team with your approval. I realize we may have to adjust dates depending on your council's schedule so we will wait to hear back from you.

Rossetti Career & Technical Education Center Senior Internship Program

The Career and Technical Education internship program affords students opportunities to gain "real life" work experience, improve job/employability skills, and explore career options. Work-based learning provides students with an enhanced understanding of the workplace through utilization of host worksites in the community. Participating employers can provide educators with feedback pertaining to the student's career related skills and overall employability in today's job market.

Seniors enrolled in Career and Technical programs will be eligible for internships based upon academic and technical performance, teacher recommendations, and attendance. These internships will typically correspond with their morning classroom sessions of 8:30 am - 11:15 am. This arrangement will be based upon a non-paid experience and intended to be an extension of the student's classroom learning. Student supervision will be coordinated through the CTE teacher, a Work Based Learning Coordinator, and the on-site supervisor/mentor.

Among community partners are county and state governmental agencies, local school districts, hospitals, colleges and a variety of business and industry organizations. If your business or agency is interested in participating in this program by becoming a host worksite, please contact our Work Based Learning Coordinators, Barb Knight (361-5707), or Chris Regner (361-5715)

Goals of the Internship Program

Connect school based learning with authentic work-based experiences.
 Provide on-the-job work experience for students completing 2 year Career & Technical Education programs.
 Enhance the meaning and purpose of classroom learning experiences.
 Assist students in developing positive work habits, attitudes, and interpersonal skills through realistic learning environments.
 Help students develop and clarify future career goals.
 Serve as a means to provide feedback for continuous improvement of Career and Technical programs.
 Develop partnerships between employers and the Rossetti Career & Technical Education Center to support high school students in their career planning.
 Promote a more stable workforce by introducing students to local employment opportunities.

RE: Request for Legislation -

Tim:

I am in receipt of a Request for Legislation from Councilor Smith dated February 27, 2013 relative to the installation of a Stop Sign on the eastbound Lenox Street approach to Levitt Street. This request was made based on the fact that there is no sign currently present and that there is increased activity at this intersection due to the Liberty Gradens renovation project. I have reviewed the site and find the request to be reasonable.

If you have any questions please feel free to contact me.
